| • Python | • MySQL | • Workbench | • Business Analysis |
| • Power BI | • Statistics | • GitHub | • Process Improvement |

Cloud Platforms: Microsoft Azure (Conceptual understanding of Azure Data Factory, Azure Data Lake, and Azure Synapse Analytics for data pipelines and analytics).

WORK EXPERIENCE

Data Analyst | Sisesoft IT Solutions – Hosur, TN

08/2025 – Present

- Executed ETL processes to convert legacy and transactional data into structured datasets for e-commerce analysis.
- Developed SQL queries to analyze sales, order transactions, and inventory performance.
- Conducted SQL and Python analysis on website traffic and customer behaviour to optimize the purchase funnel and improve conversions by 12%.
- Created Power BI dashboards to track KPIs such as sales trends, product demand, and campaign performance.
- Analyzed customer purchase patterns and product categories, identifying trends that increased product uptake by 10%.
- Utilized GA4 and Google Search Console to evaluate traffic sources and user journeys, improving targeted marketing by 20%.
- Applied descriptive statistics and data cleaning techniques to handle missing and inconsistent data.
- Built Power BI data models linking fact tables (orders, sales) with dimension tables (products, customers, time).
- Used Power Query (M Language) for efficient data transformation and automated dataset refresh.
- Collaborated with marketing, sales, and operations teams to gather reporting requirements.
- Scrutinized sales data to identify low-performing products and cart abandonment issues, recommending improvements.
- Designed clear data visualizations to present insights for business decision-making.
- Generated monthly reports on key e-commerce metrics including revenue, conversion rate, and inventory turnover.

Tools: Power BI, SQL (Workbench), Excel (Pivot Tables), Power Query, Statistics.

Demand Generation Specialist – Intern | Codingmart Technologies Pvt Ltd – Coimbatore, TN

06/2025 – 07/2025

- Performed funnel-based analysis on web analytics, optimizing marketing funnel and enhancing online conversion rates by 12%.
- Used Microsoft Power BI for dynamic visualization to support product marketing efforts that increased launch efficiency by 17%.

- Used data analysis to launch successful digital marketing strategies that increased web traffic by 30%.
- Tracked website traffic flow and provided internal reports regularly.

PROJECTS

Marketing Campaign Performance Dashboard | Power BI [Link](#)

Tools: Microsoft Power BI, Microsoft Excel

- Analyzed 5M+ impressions, 522K clicks, and 62K conversions to evaluate marketing campaign performance and customer engagement.
- Developed an interactive marketing analytics dashboard tracking KPIs such as CTR, CPC, ROI, ad spend, and conversions across multiple marketing channels.
- Performed ROI analysis on 299 marketing campaigns to identify high-performing regions and customer segments.
- Delivered insights showing high-ROI campaigns generating up to 30% higher revenue, supporting data-driven marketing strategy.

Superstore Sales Analytics & Forecast Dashboard | Power BI [Link](#)

Tools: Microsoft Power BI, Microsoft Excel

- Analyzed 22K+ orders dataset generating \$2M+ in sales and \$175K profit to uncover sales trends and regional performance insights.
- Built an interactive Power BI dashboard tracking key KPIs including revenue, profit, order volume, and average shipping time across 4 regions and multiple product categories.
- Implemented 15-day sales forecasting using historical sales data to support demand planning and future revenue prediction.
- Identified top-performing states and product segments contributing ~40% of total revenue, enabling targeted business decision-making.

Cash Flow & Expense Intelligence Dashboard | Excel [Link](#)

Tools: Microsoft Excel

- Analyzed ₹23L+ financial transactions across multiple expense categories to understand spending patterns and financial behavior.
- Developed an interactive financial analytics dashboard tracking income, expenses, and monthly cash flow trends.
- Identified top 5 expense categories contributing nearly 60% of total spending, highlighting potential cost optimization opportunities.
- Enabled users to monitor income vs expense trends using dynamic filters and drill-down visualizations.

EDUCATION

B. Tech - Computer Science and Business Systems
K. S. Rangasamy College of Technology – **Namakkal**
CGPA: 8.62 /10 – First Class with Distinction

08/2021 - 05/2025

ACHIEVEMENTS

- Microsoft Power BI Data Analyst – **Microsoft**
- Research Paper Presentation – **IEEE**
- Supervised Machine Learning – **IBM**
- Salesforce Developer Virtual Internship – **Salesforce**
